AI ENGINEERING

LLM integration (Claude, OpenAI)
Agentic systems & MCP
RAG architectures
Prompt engineering
Responsible AI practices

PRODUCT & DELIVERY

Product-driven decision making
End-to-end product development
Scalable architecture design
Cross-functional collaboration

FULLSTACK

React & TypeScript
Angular
Node.js & Express
RESTful APIs & NestJS
MongoDB & NoSQL

— LANGUAGES

English
Spanish (native)

— PROFILE

I design and build *the systems behind useful products*. Nine years shipping software end-to-end, now leaning hard into AI-powered product engineering — LLMs, agents with MCP and RAG, prompt engineering as a product discipline. I question requirements before writing code and ship small, opinionated things. Strong fullstack across React, Angular, TypeScript, Node.js, NestJS, Express and MongoDB. *Responsible AI* by default — guardrails, honest limits, humans in the loop where it counts.

— EMPLOYMENT HISTORY

- **Senior Fullstack Developer** — Lean Tech, Medellín
SEP 2022 — PRESENT
- **Full Stack Engineer** — iSeven, Medellín
JUN 2021 — JUL 2023 · FULL-TIME → PART-TIME (2022)
- **Full Stack Developer** — Securitic, Popayán
MAY 2020 — MAY 2021
- **Full Stack Developer** — Creazion, Popayán
SEP 2019 — MAY 2020
- **Freelance Full Stack Developer** — Independent
2021 — 2022 · CONCURRENT
Selected clients: SYP Solutions, Comunix S.A.S., CEOTIC

— SELECTED PROJECTS

- **Dev Senior Code Platform** — Lead Engineer
2023 — PRESENT · devseniorcode.com
Full-stack platform for a programming academy with 600+ students. Replaced WhatsApp-based ops with student portal, admin dashboard, program management and scheduling — automated where it made sense, kept humans in the loop where it mattered. Stack: Next.js, NestJS, React, PostgreSQL, MongoDB, Redis, n8n.
- **EYP Logistics** — Product Designer & Engineer
FREELANCE · eyplogistic.com
Replaced a legacy logistics platform plus WhatsApp-based customer ops with a self-service product: marketing site, client portal, admin platform, integrated payments. Customers now track, request and pay without messaging support. Stack: Next.js, NestJS, PostgreSQL.

— EDUCATION

- **Systems Engineer in Software Development** — University Corporation Comfacaucá
JAN 2017 — JAN 2022
